

CMP342

Project #2 Due Wednesday November 1, 2017

Minimum Requirements:

Create a website for your topic of choice:

(fan club, business, school, your career history, your interests, Internet of Things)

- 1 main page (index.html) with multiple sections
- 1+ more page with at least 2 sections
- 1 form
- 1 table to display data relevant to your topic
- 1+ .css file with your style (link to it for uniform look & feel)
- 1+ media query to adjust style based on screen size
- 1+ .js file with your javascript
- 1 navigation bar with links to all other pages/sections within your site
- Include at least 1 image in your site
(either as background or just as an image that is relevant to your site's content)
- Include either audio or video with controls so the user can choose to play or not
- Use a Button to submit the form content.(You can use action:mailto to send via email, or for extra credit you can use javascript to store the data)
- Use Javascript for your form to assure the required input is not empty/invalid
- 1 alert() when the form is not filled correctly
- Modify the style of invalid input so the user will see it and correct their input

Extra credits:

Storing the submitted data(firebase, a file, google sheets, local browser storage, a db)

Special effects using @keyframes, -webkit-transform, -webkit-filter

Comments:

- There should be uniform style by linking to your .css file(s)
- Be creative, this should be a project you enjoy and will want to show off as part of your portfolio after you are done

Feel free to email me with any questions.
